GYRO LAMP & SHADE CORPORATION

Dear Friend:

We send you herewith our new and larger catalog for 1949, showing all parts necessary to build, repair or convert lamps

In presenting this catalog we feel that we are filling a long felt want, for here at last is a place where you can send and get any lamp part you may need, without having to send to various firms all over the country.

Because of the change in prices, the addition of many items and the discontinuance of a few, all former catalogs are now VOID. We will accept orders from this catalog only. We carry an enormous stock so that your order, with few exceptions, can be filled within 24 hours.

With twenty years experience in the lamp business, we feel that we know the parts you need, so we have made up this catalog with your needs in mind. So look it over carefully, read the general instructions thoroly, then choose what you may desire, and your order will be filled with the same consideration as if you were visiting us in person.

Yours very truly,

J. W. Bier
PRESIDENT

GYRO LAMP & SHADE CORP.

GENERAL INSTRUCTIONS

BEFORE ORDERING be sure to **READ** every word of these instructions, especially the paragraph on "SIZES." It will save confusion and delay on your orders.

Figure the amount of your order and add \$1.00 for postage and insurance. We return difference with your invoice in either cash, stamps or credit slip. If too heavy we ship by express and return the deposit.

We guarantee every article as to quality and construction. Notify us if you wish to return anything for any reason and we will advise disposition, after which we will give refund or credit.

We carry few parts for floor lamps as they are too bulky to ship.

We do not carry any other electrical supplies, such as for house wiring, appliances, fluorescent, etc. **LAMP PARTS ONLY!**

If you are a dealer, send card or letterhead for confidential quantity discount. If you do not do this, you will not get discount.

Use our order blanks, print name and address plainly. Order by number and name of item and insert prices and state if you are a dealer.

DO NOT SEND US ANY LAMPS OR BURNERS TO BE ELECTRIFIED. We do not do this kind of work. We only sell parts to those who do. You will be wasting postage, for we will return them unelectrified.

Write for 100 or 1,000 price when not so listed.

COD SHIPMENTS

We will accept orders for COD shipments only if the order is accompanied by a remittance of 25% of the amount of the order.

All prices are subject to change without notice and all orders are accepted on the basis of being billed at prices prevailing at time of shipment.

Packing and handling costs prevent us from accepting any order under \$1.00. Your lot of merchandise **MUST** total \$1.00 or we will return your remittance.

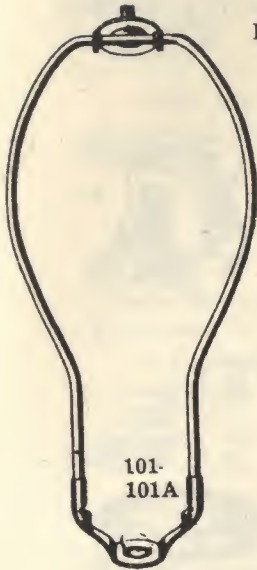

SHADES and **GLASS** sent by express only. No parcel post on these items—too much damage.

If you insist on glass by parcel post. No insurance and at your own risk.

SIZES

4/27 Thread is the size that fits the top of a harp.

⅜ Thread is the size that screws into a socket.

¼ Thread is the size used in floor lamps.

Finials are tapped 4/27 but may be had in ⅜.

No. 1 Adapters fit ⅞ inch opening.

No. 2 Adapters fit 1⅞ inch opening.

No. 3 Adapters fit 1¾ inch opening.

10 inch spider shade holders can be cut-off and bent to any size. If you want

Gyro Converters to set lower, order made with 153-154 adapters.

A No. 1 chimney is 2½ bottom, 1¾ inch top, 7½ tall.

A Rayo chimney is 2½ bottom, 2 inch top, 10 inches tall.

A No. 2 chimney is 3 inch bottom, 2½ inch top, 8½ inch tall.

A globe with a 4 inch bottom will NOT go over a No. 2 chimney which has a bulge of 4 inches. However our No. 808 special chimney has only a 3½ bulge and a globe will fit.

Numbers 503, 504, 505, 506, 507 and 508 fit lamps with a ⅞ inch opening into which the converter screws. Those numbers followed by "A" use No. 2 which fit into an opening 1⅞ inch diameter. Those followed by B use No. 3 which fits 1¾ inch opening.

4551B, 4 inch ball shade holder will fit No. 4549 chimney holder if cut in five places on inside rim.

Shade sizes are bottom measurement.

NO DISCOUNT ON SPECIAL PLATING.

HERE IS SOMETHING NEW!

GYRO Round Wick Converter

**FITS RAYO, ROCHESTER, and Many
Gone With The Wind LAMPS**

Just the article every Antique Dealer and Repair Man has, for years, been hoping someone would devise.

*No more spending hours wiring a round wick lamp, when in just a few minutes you can install the sturdy . . . **Gyro Converter***

Made of solid brass, with approved rubber cord and dependable switch. Does not change appearance of lamp.

Complete, Ready to Install . . .

(Picture at right shows how it

appears on a Rayo Lamp)

No. 5003—GYRO ROUND WICK CONVERTER. Fits Rayo, Rochester, etc. Brass only for use with chimney and glass shade. Take out old burner, cut off inside pipe, insert Gyro Converter, put washer and nut on bottom, make hole in base for switch, connect switch and put on end plug and lamp is ready to light. A few minutes work instead of hours.

521 10 inch Spider Holder 70¢ extra. 4 inch Ball Shade Holder .40 extra. Above outfit does not include shade and chimney, which are extra.

\$5.00 EACH—\$28.50 FOR 6—\$50.00 DOZ.
Plus Postage and Insurance.

Non-electric Hurricane Lamps

If you're like most 20th-century Americans, you're fond of Colonial-style hurricane lamps. They're perfect for use on buffet or mantel. Cranberry-red chimneys make a splash of color; pendants give a prismatic sparkle. Collars prevent wax from dripping, and chimneys keep drafts from blowing candles out. Hurricane lamps give the romantic glow of candlelight . . . without the trouble created by candlesticks. Complete with white candles.

Clear Crystal (not electric). Choice
750— of white frosted or clear ruby
chimneys. (Pairs only).

1948—GYRO Round wick converter kit.....	Each \$1.75, Dozen \$20.00
2050—Filigree $\frac{1}{2}$ inch, per yard40

RAPID BRUSH PLATING

**PLATING MISCELLANEOUS SMALL ARTICLES
REPLATING WORN SPOTS IN PLATED FINISHES
PLATING DECORATIVE DESIGNS AND ART WORK**

HERE'S HOW IT WORKS!

ELECTROPLATING by Brush is easy and simple. The brush is dipped into the plating compound, saturated thoroughly, then applied to the surface being plated. The electric current is carried through the brush and Anode, through the compound containing metal ions, and then into the article being plated. As the electrical circuit is completed a permanent, protective deposit of metal is applied to the object. Thickness for thickness as durable and beautiful as that achieved by the conventional tank method!

1. DIRECT CURRENT FOR PLATING—is obtained from two No. 6 dry batteries connected in series (3 volts) as shown at left, for general plating work. Three batteries in series (4½ volts) can be used to speed up plating on surfaces larger than 4 square inches, but requires more careful brushing. **CONNECT BRUSH TO POSITIVE (+) AND WORK TO NEGATIVE (-),** when ready to plate.

Only one Kit is required (any kind). If more than one metal is wanted order additional Compounds..

Kits Complete		Compounds

We will continue as in the past to ship all orders within 24 hours of their receipt. Due to circumstances beyond our control we may at times be temporarily short on some item. In that case we back order and ship when in, or refund remittance and request a re-order.

LAMP SHADES

While we carry an enormous stock of shades, it is impossible to carry every size, of every color, of every kind, of every shape in stock for to do so would require a stock at all times of 28,800 shades if we had 100 of each. Therefore, if we do not have the shade you ordered in stock, we make them and ship within ten days. Owing to the high cost of containers, we must charge 50¢ packing charge on less than six shades.

NO OPEN ACCOUNTS

Being a mail order house we must have cash with order, for to have thousands of accounts ranging from \$1.00 to \$500 scattered all over the world would take an army of bookkeepers and unlimited capital.

CAREFUL PACKING

All merchandise is packed in sturdy boxes by experienced packers and should reach you in perfect condition, but if it comes in with the box mashed or the contents broken, don't blame it on the packing, but the rough handling by the carriers. For instance on a shipment of fourteen boxes from a glass factory, packed in the proper boxes by packers with years of experience, twelve of the boxes were mashed and upon opening found that 59 shades of the 72 were broken. The breakage on shipments to us is terrific and we can understand why you sometimes get packages with the contents broken.

Packing and handling costs prevent us from accepting any order under \$1.00. Your lot of merchandise MUST total \$1.00 or we will return your remittance.

SHADES and GLASS sent by express only. No parcel post on these items —too much damage.

DAMAGED MERCHANDISE

NOTE — RETURN NO GOODS WITHOUT OUR CONSENT. If goods are damaged in transit the DELIVERING TRANSPORTATION CO. is required by law to make notation of damages on your paid freight or express bill. If the damage is CONCEALED they are obliged to make inspection AFTER goods are unpacked. Transportation rates are made in proportion to DAMAGE LIABILITY, therefore the carrier and NOT the shipper should be charged with all loss or damage. Whether freight, express or motor shipments, make your claim against the Transportation Co. UNDER NO CONSIDERATION ARE WE RESPONSIBLE FOR DAMAGE IN TRANSIT EXCEPT PARCEL POST, WHICH IS INSURED.

We do not ship to foreign countries except by parcel post. Too much red tape otherwise.
